

Tulstar Products, Inc. is pleased to announce a partnership with Norphlet Chemical to construct a HFC 134A (1,1,1,2 tetrafluoroethane) manufacturing plant based in Norphlet, Arkansas. This world-class facility is currently being constructed with a completion date of late in the first quarter of 2006. The plant is projected to produce 10 plus million pounds of material in the first year of production. All product is guaranteed to meet ARI 700 standards. Tulstar has the capability to supply customers with bulk material and will market to all industries.

Tulstar Products was established in 1986 and has an expert staff of professionals with decades of experience in marketing and worldwide distribution. We are also a fully insured supplier of oils, gases, chemicals, and solvents nationwide. Tulstar offers third party testing for all of its products by nationally recognized laboratories. We invite you to visit our website, www.tulstar.com, to learn more about what Tulstar has to offer. If you have any further question regarding Tulstar Products or our 134A material please contact us at 1-800-988-5782.
