

TSCA STATUS NOTIFICATION

THIS NOTICE IS PROVIDED FOR THOSE PRODUCTS NOT INCLUDED ON THE EPA TOXIC SUBSTANCE CONTROL ACT (TSCA) INVENTORY AS REQUIRED BY 40CFR 720.36(c)(2)

1. The health risks of these products have not been fully determined. Toxicity and safety data that becomes available will be supplied on a Material Safety Data Sheet (MSDS).
2. All products supplied by Tulstar Products, Inc. are supplied for use in Research and Development by or under the supervision of a technically qualified person as defined in 40CFR.
3. The Tulstar Products, Inc. Catalog lists the TSCA status of all materials, the product container label and MSDS also state the TSCA status.
4. The fact that a product is included on the TSCA inventory does not necessarily mean that it can be used for commercial purposes. All materials used to make a product for commercial use must be included on the TSCA inventory. There are instances where classical routes to materials that are included on the TSCA inventory have been changed (for example CFC starting materials may not now be available and new chemistry may be developed to synthesize such products). If you have a commercial application for a Tulstar Products, Inc. product, it is imperative that you discuss this with Mark Fletcher -- 918-749-9060, x207.
5. **THIS NOTICE MUST BE DELIVERED TO THE REQUISITIONER WITH THE PRODUCT(S) IN THIS SHIPMENT.**
